Tabla en PostGreSql

The screenshot shows the 'usuarios' table configuration in a PostgreSQL database. The 'Columns' tab is selected, displaying a table with the following columns:

	Name	Data type	Length/Precision	Scale	Not NULL?	Primary key?	Default
	id	bigint			<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	
	nombre	character varying	20		<input type="checkbox"/>	<input type="checkbox"/>	
	pais	character varying	20		<input type="checkbox"/>	<input type="checkbox"/>	

At the top of the configuration window, there are tabs for 'General', 'Columns', 'Advanced', 'Constraints', 'Parameters', 'Security', and 'SQL'. Below the 'Columns' tab, there is a section for 'Inherited from table(s)' with a dropdown menu labeled 'Select to inherit from...'. A '+' button is located at the top right of the 'Columns' table.

Desde pgAdmin4

- Seleccionar la BD:
 - **PSQL** (desde pgAdmin)
 - Escribir el comando **COPY**:
 - \copy usuarios from
'D:\OneDrive\Escritorio\postgresql\repositorio\csv\usuarios.csv'
delimiter ';' NULL AS " CSV header encoding 'utf-8';
 - *\copy tabla from 'pathfile.csv' delimiter ';' NULL AS " CSV header encoding 'utf-8';*

Resultado

	id [PK] bigint 	nombre character varying (20) 	pais character varying (20) 
1	1	José Tomás	España
2	2	Ángel García	España
3	3	Andrés Carrión	España
